

Lecture: Music Processing Analysis

WS 2015/2016

Instructor

Prof. Dr. Meinard Müller

Format

Lecture: 2 SWS, Monday 16-18
ECTS-Credits: 2,5 (5 with exercises for Computer Science Students)
Language: English
First Meeting: Monday, 12.10.2015, 16-18
Place: Room 3R4.04, Am Wolfsmantel 33

Content

In this course, we discuss a number of current research problems in music processing or music information retrieval (MIR) covering aspects from information science and digital signal processing. We provide the necessary background information and give numerous motivating examples so that no specialized knowledge is required. The students should have a solid mathematical background and some background in digital signal processing. Topics include:

- Music Representations and Audio Features
- Music Synchronization and Alignment
- Audio Structure Analysis and Segmentation
- Tempo and Beat Tracking
- Content-based Audio Retrieval

Accompanying Textbook

Meinard Müller
Fundamentals of Music Processing
Audio, Analysis, Algorithms, Applications
483 p., 249 illus., 30 illus. in color, hardcover
Springer, 2015
